 WASTE WATER TREATMENT PLANT
 P.O. Box 1952
 LONGVIEW, TX 75606

Dear Industrial User,

The following is a table that shall accompany the permit application. It meets the requirements for Section F: Characteristics of Discharge of the permit application. All industries submitting a permit application for a new Industrial Waste Permit are required to test for the parameters in 40 CFR 122, Appendix D, Tables II and III. Those submitting a permit application for a renewal of a current permit may or may not be required to test for these parameters. Please contact Industrial Pretreatment at 903-291-5234 to get more information if you are renewing your current permit. Before submitting your permit application and the required documents and plans, please contact a lab to sample your effluent for these parameters. Fill out this table using the lab results submitted to you by your lab. Send the completed table and lab results, permit application, required documents and plans and other necessary information you feel is important to expedite the permitting process. If you have any comments or questions, please contact Industrial Pretreatment at 903-291-5234. Thank you.
