

Patterson Park Comment Responses 6-20-19

Residents approved a \$24.1 million Bond Proposition in November 2018. The projects included were:

1. Completion of the Lear Park Master Plan
2. Improve Existing Parks
3. Updating Broughton Recreation Center and Park
4. Reconstruct Cargill Long Trail
5. Developing the Arboretum

The existing parks identified for improvements are Lois Jackson Park, McWhorter, Patterson, Spring Creek, Stamper/Womack, Rollins and Spring Hill. The bond issue in February, 2019 provides funding for each of these except Rollins and Spring Hill. The bond issue in 2023 will fund improvements at Rollins, Spring Hill and McWhorter West.

A meeting was held at the Longview Christian School to present the Concept Plan for Patterson Park. A short presentation provided the priorities for projects and amenities included at each park. Each attendee was asked to review the display boards, and complete and return a survey. A total of 8 surveys were collected.

Below are the results of the survey in the order in which it was asked.

Should the playground be designed with a theme?

Please list in order of preference the top 3 pieces of equipment.

Preference for retaining wall material?

How frequently is the basketball court used?

Park Maintenance

Anything missed/additional comments

This open-ended question allowed respondents to provide us with suggestions on anything we missed in the concept or provide additional comments. Of the surveys returned, 6 surveys had comments. Below is a wordcloud representing the comments. This summarizes the results with more frequent words shown larger.
